CMP PHILOSOPHY

All students should be able to reason and communicate proficiently in mathematics. This includes knowledge of and skill in the use of the vocabulary, forms of representation, materials, tools, techniques and intellectual methods of the discipline of mathematics, including the ability to define and solve problems with reason, insight, inventiveness and technical proficiency.

Want to know if this workshop would be a good fit for you?

Consider attending this training if you are:

- Not currently using the program but **would like to know more about it**
- A **first** or **second-year teacher** of CMP
- **Transitioning grade levels** and will be teaching CMP in your new grade level
- Teaching CMP and have **never been trained** at your current grade level
- **Supporting** a CMP classroom (i.e. administrators, learning coaches, ELL teachers, special education teachers)
- Experienced with CMP but have not been trained on a **particular unit of interest**
- Experienced with CMP but have not been trained on **grade levels other than your own** and need to gain a broader understanding of how the content of the program builds

The key to a successful CMP teacher, classroom, school, and district is on-going professional development focused on reflection and collaboration.

We hope that you can join us for this great week of math-filled fun!!!
